K: Read the text and answer the questions.(۲)

Microbes live all around you, on you and inside you! They are very small and some microbes make you sick but others keep you healthy and even help you to fight disease.Bacteria and viruses are two important types of microbes.Bacteria can live in any area of the earth.They aren't all bad ; in fact you couldn't live without some bacteria!

Viruses are smaller than bacteria.They can't live on their own,they need to be inside a living cell to live and grow and usually attack your body and make you sick!

۱-Viruses need to be inside aliving cell to live and grow. True... False.....

۲-Sometimes bacteria is useful for us. True.... False.....

۳- Where do microbes live?

۴-Viruses are dangerous for us, Why?

With the best wishes for you
